

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

W. WATSON & SONS' MICROSCOPES.

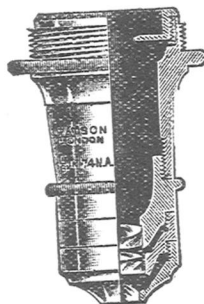

Watson's Van Heurck Microscope Stand, from \$96.20

Watsons' Microscope Stands are the last word in Microscope construction. Every detail is so contrived as to produce perfect working with minimum labor and maximum comfort with a lifetime of working efficiency.

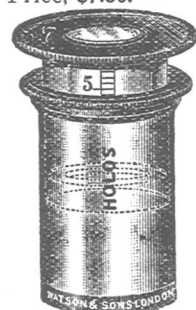

If you are not familiar with Watson's Microscopes, send for their 168-page catalogue No. 2. A. M. (See address below.)

The *Van Heurck Microscope*, as figured, is the ideal instrument for those who want the finest mechanical means and conveniences, whether for Visual or Photographic purposes. It has no equal anywhere.

Some Items Exclusively Watson's

1/6-in. Objective

Holoscopic Eyepiece

Aplanatised Abbe Illuminator gives .15 more Aplanatic Aperture than the old form Abbe Illuminator, and costs no more.

Holoscopic Eyepiece.—This ocular has an adjustment by means of which it is rendered suitable for either Achromatic or Apochromatic Objectives, and gives the best possible correction for either kind. A special feature is that which minimizes the roundness of field of Objectives. For Students' Microscopes, each \$4.90.

Director Eyepiece.—Enabling teacher, and taught to view the same object and the same point in that object at one time. The simplest and best. Price, \$12.20.

New Dissecting Stand, for laboratories... \$ 6.10

New 1/12th-inch Oil Immersion 1.30

N. A., with flat field..... 24.40

New 2 mm. "Holos" Oil Immersion 1.37

N. A. 39.00

Projection Apparatus. Photo. Micro. Apparatus in great variety

See Catalogue 2D. Free on request.

MICRO. OBJECTS. The finest assortment in the world to choose from. Every class of research represented. **Catalogue No. 3 M, post free.**
